

# THE MODULAR BOOTH

## THE STORY

Our Modular kiosk fits every circumstance and configuration.

If you want it in 'photobooth' mode? No problem. This version includes a touch screen computer, a DSLR camera, LED lighting and a flash. You need it to print photos? That's possible too, with a complementary module...

The Modular Booth also offers a wide variety of interesting plug-ins that support the technical system in place, in order to ensure smooth activation. From a barcode reader to an additional screen mounted on the back, it takes care of everything!
